CLIENTELE PAST PERFORMANCE

Anavi Strategies exceeded our expectations! Anjali and her team's thoughtful approach and expertise were invaluable to our recent strategic planning process. We appreciated their knowledge of trauma-informed practices, incorporation of data, and dedication to creating a comprehensive 5-year strategic plan that brought our organization's vision to life, all while ensuring our members remained fully engaged throughout the process.

At Anavi Strategies, we believe that social and organizational change happens within the context of trusting, supportive, and safe relationships.

We developed trauma-informed business practices, and model our approach for clients by embedding such practices in every aspect of our client-facing work.
